

20 July 2007

**Welcome to CODAR Team:
OSIL, United Kingdom
Aqua Vision BV, Netherlands**

CODAR Ocean Sensors is pleased to welcome two additional companies to the CODAR global team. OSIL (Ocean Scientific International Ltd.) based in England and Aqua Vision in Netherlands have joined the CODAR team as official representatives, offering SeaSonde products and value-added services within their respective regions. Both companies will work in close coordination with the new CODAR Europe office for providing project planning consultations, sales and technical support to customers.

ABOUT OSIL

Formed in 1989, OSIL operates from a purpose built facility in Havant, Hampshire, United Kingdom. OSIL supplies products and services for environmental measurement particularly related to marine, freshwater and meteorological applications. All instruments and systems are supported by OSIL's in-house comprehensive service, repair and calibration facility which is ISO 9001 accredited. Major clients include BP, Halliburton, Safage, Esso, ABP, NOC, Scripps, WHOI, Ifremer, Navocean, UKHO, and Thales. Starting this month, OSIL will exclusively represent CODAR Ocean Sensors in the United Kingdom.

OSIL's Managing Director, Dr. Richard Williams says of the latest addition to OSIL's catalogue of products, "the SeaSonde is the obvious choice for monitoring surface currents and waves in a wide ocean area and OSIL are enthusiastic that many UK organizations' projects will benefit from Codar's system."

Learn more about OSIL by visiting their website <http://www.osil.co.uk>. For further information, contact Dr. Richard Williams, Managing Director, OSIL, E-mail richard.williams@osil.co.uk; Telephone: +44 (0) 2392 488 240.

ABOUT AQUA VISION

Aqua Vision BV is a consultancy firm in the field of hydro- and oceanography. They organize and execute research projects and are specialized in the development of software for acquisition and analysis of hydro- and oceanographic data. Staff members are also quite strong in hydrodynamic modeling. Customers include government, research institutes, districts of water board, dredging companies, offshore and port authorities.

Since forming in 1995, they have built a reputation as experts in the field of acoustic current meters, and now are extending their skill base to include the SeaSonde HF radar system. These two technologies are considered highly complementary to each other and can offer a three-dimensional view of ocean dynamics not possible with other techniques. Effective July 2007 Aqua Vision is CODAR's exclusive representative for the Netherlands.
